Come Invent with Us this Summer
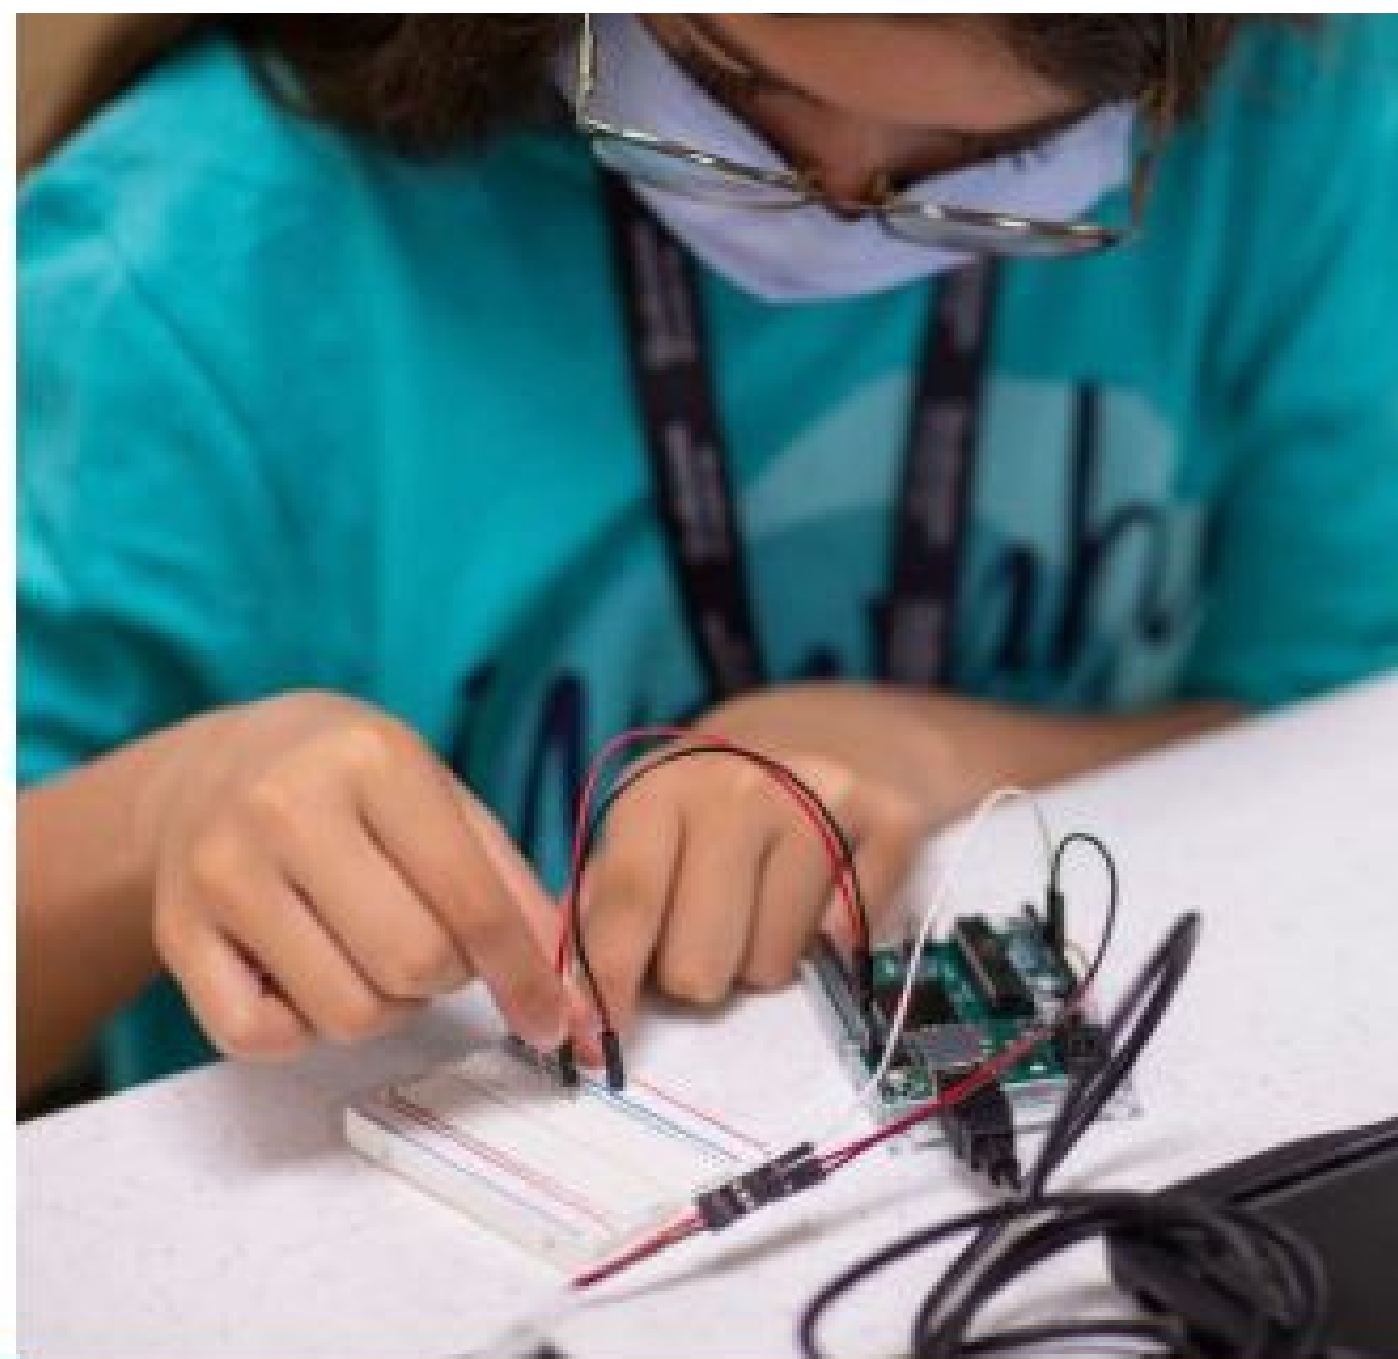

Attend a FREE Thinkabit Lab Summer Camp in 2022

The Qualcomm® Thinkabit Lab™ is a hands-on invention-based program committed to inspiring the next generation of inventors. Through this program, students will:

- Create circuits like an electrical engineer
- Code like a computer scientist
- Build an invention like a mechanical engineer

Tech for Good
Students learn to use technology and take inspiration from Qualcomm® Wireless Reach™ initiatives to invent a solution to a real-world problem.

AgTech for Good
Students draw on their experience in agricultural communities and utilize IoT-based technology to develop innovative solutions to local problems.

Wearable Tech
Students explore their strengths, interests and values while learning to code LED lights and Servo motors and apply these skills to create an automated wearable.

Tech for Good / Coed for rising 9th and 10th graders

July 18th – July 22nd

9:00 – 3:00

Cedar Point Elementary School
